

Aluminium Billets:~

HG Aluminium Smelters Limited manufactures high-quality homogenized aluminium billets designed primarily for aluminium extrusion manufacturers. These billets serve as the raw material for producing precision extrusion profiles across a wide range of end-use industries.

Used By

Aluminium Extrusion Profile Manufacturers

Architectural Extrusion Manufacturers

Solar Profile Manufacturers

Industrial Extrusion Manufacturers

Automotive Extrusion Manufacturers

Electrical Profile Manufacturers

General Engineering Extrusion Companies

End-Use Industries Through Extrusion Profiles

Our billets are converted into aluminium extrusion profiles that are subsequently used in: Solar Energy, Architecture & Construction,

Automotive & EV, Electrical & Electronics,
Transport, Industrial Engineering, HVAC,
Furniture and other engineering applications.

Engineered for Extrusion Excellence

Our homogenized aluminium billets are developed to support consistent extrusion performance, surface quality and dimensional reliability for profile manufacturers serving diverse industrial sectors.
